LIST OF ACRONYMS

| | |
|-------|---|
| CFR | Code of Federal Regulations |
| DCD | Deseret Chemical Depot |
| TOCDF | Tooele Chemical Agent Disposal Facility |

4.1 SECURITY [R315-3-2.5(b)(4); R315-8-2.5]

4.1.1 Security at the facility shall meet the criteria and standards of the Department of Army Regulation 190-59, "Chemical Agent Security Program." This regulation specifies criteria and standards for the storage, handling, and movement of chemical surety materiel. It specifically describes the contents of physical security plans that are required for installations that have a chemical storage mission, requirements for perimeter security and storage structure protection systems, security procedures, requirements for security forces, and standards for physical security. The stipulations of AR 190-59 are more stringent than the security requirements set forth in R315-8-2.5.

4.1.2 In addition to the security procedures in effect at the facility, the installation provides overall security. The Chemical Surety Restricted Area, located adjacent to the facility has a security system that complies with AR 190-59. All security systems are in full effect during chemical demilitarization operations. The unclassified portion of the various security systems is discussed below. A map depicting the location of fencing, gates, and warning signs for the Tooele Chemical Agent Disposal Facility (TOCDF) and the entire perimeter of the Deseret Chemical Depot (DCD) is shown in drawing TE-16-C-2 which is located in Attachment 11 (General Facility Drawings) of this Permit. These systems will prevent unknowing entry into the facility and minimize the possibility for the unauthorized entry of persons or livestock onto the facility by use of the following procedures and equipment: (1) fencing around the entire facility perimeter; (2) 24-hours-per-day, seven-days-per-week surveillance by armed patrols; (3) warning signs posted along perimeter fences to discourage unknowing or unauthorized entry; (4) entry limited to one gate, staffed by armed security personnel; (5) access limited to persons and vehicles displaying appropriate identification badges and vehicle placards; (6) two-way radio communication; (7) telephone communications available at selected facilities; and (8) security lighting provided at key locations.

4.2 GENERAL SECURITY PROCEDURES AND EQUIPMENT [R315-3-2.5(b)(4), R315-8-2.5(a)]

4.2.1 The security provisions for the TOCDF are in addition to that of the Deseret Chemical Depot (DCD) security provisions. The following procedures and equipment at the Tooele Chemical Agent Disposal Facility (TOCDF) prevent unknowing entry into the facility and minimize the possibility for unauthorized entry of persons or livestock onto the facility: (1) fencing surrounding the site; (2) 24-hours-per-day, seven-days-per-week surveillance by armed patrols; (3) warning signs posted at the area perimeter; (4) routine entry to the facility limited to one gate, staffed by armed security personnel; (5) routine access limited to persons displaying appropriate identification badges and vehicle passes issued only by the Security Office; (6) two-way radio communication; (7) security lighting to illuminate the entire facility. [DCD Area 10 Igloos 1632 and 1634 are not located within the TOCDF proper, but serve as permitted container storage units for TOCDF.](#)

4.3 TWENTY-FOUR HOUR SURVEILLANCE SYSTEM [R315-8-2.5(b)(1)]

4.3.1 Continuous surveillance of the facility is accomplished by security patrols. Overall administration of security personnel is performed by the Chief, DCD Security Office. The TOCDF perimeter is monitored by security forces.

- 4.3.2 Each patrol is radio equipped. Typical duties required of patrol members include:
 - 4.3.2.1 Check for possible intrusion or security violations.
 - 4.3.2.2 Check the security of the buildings within the patrol area.
 - 4.3.2.3 Check the physical integrity of perimeter barriers.
 - 4.3.2.4 Challenge persons within the patrol area as appropriate.
 - 4.3.2.5 Report all incidents and check points.
 - 4.3.2.6 Respond to contingency calls.
 - 4.3.2.7 Perform specific duties as assigned.
- 4.3.3 Each patrol is equipped with required protective equipment. Limited first aid supplies, fire extinguisher(s), and lights are available. All patrols are armed.

4.4 BARRIER [R315-8-2.5(b)(2)(i)]

- 4.4.1 The facility is surrounded by chain-link security fences. The perimeter is completely lighted. The fence is maintained in good repair.

4.5 MEANS TO CONTROL ENTRY [R315-8-2.5(b)(2)(ii)]

- 4.5.1 Visitor access to the facility within the fenced perimeter is controlled by a 24-hour guarded gate. Visitors are accompanied at all times during their visit to the facility and are subject to security checks.
- 4.5.2 For those individuals who routinely work in the facility, picture identity badges and other forms of identification are required at the entry control point. These badges are issued by the DCD to each individual.
- 4.5.3 A worker must be current in medical screening and training requirements as well as cleared through appropriate security programs.
- 4.5.4 Within the secure facility, certain areas have been designated as Exclusion Areas. Access to Exclusion Areas is restricted to authorized personnel who have the appropriate training. Personnel within Exclusion Areas will always work under the "Two-Person Concept" or buddy system in which each worker remains in visual contact with his partner at all times. Once personnel have entered the facility, access to Exclusion areas is controlled.
- 4.5.5 Pedestrian access to the facility is controlled by a continuously guarded turnstile system. The individual may be searched in his or her person and effects as determined by the guards. Upon acceptance of identification, the individual can pass through. All the gate guards are armed.

4.5.6 Vehicle access to the facility is controlled by a continuously guarded gate. When a vehicle requires entry to the facility, all occupants except the driver must exit the vehicle and enter through the turnstile system. The vehicle will be thoroughly searched by an armed guard.

4.5.7 Short-term access can be authorized. An authorized escort accompanies these personnel during their time within the facility.

4.6 WARNING SIGNS [R315-8-2.5(c)]

4.6.1 Signs warning that the area is restricted and dangerous, and that unauthorized entry is illegal, are posted near all facility access gates and around the perimeter. These signs are easily visible at a distance of 25 feet.
